FST21 EXPANDS INTO CANADA **WITH THE OPENING OF MONTREAL OFFICE**

Southborough, Massachusetts . . . May, 2013

FST21 has created a new security paradigm - combining security with convenience. Your identity becomes your key to access buildings, apartments and offices, to obtain services, and even to make payments. A world without keys, cards or passwords is simpler, safer and more convenient. This world-changing technology is creating tremendous interest and driving growth.

As a result, FST21, a leading technology company specializing in the field of automation and security, has recently expanded its operation with the opening of its first corporate office in Canada.

Located at 4058 Jean Talon O., Suite 100 in Montreal, Quebec, FST21's new Canadian corporate office is led by Executive Management team Mayer Gniwisch, CEO and Rony Podolsky, COO.

"FST21 is growing rapidly, Gniwisch says. "Our innovative In Motion Identification[™] capabilities in general, and our SafeRise[®] access control software in particular, are cutting-edge and revolutionizing access control across the globe," he adds. "We're pleased to now serve our growing Canadian customer base from our new office in Montreal."

FST21's award-winning access software solution - SafeRise[®] - utilizes FST21's In Motion Identification[™] capabilities to manage and control building entry points, common areas, elevators and parking areas. SafeRise recognizes people simply by the way they look and move, eliminating the need, and inherent security risks associated with solutions such as swipe cards and FOBs. SafeRise represents a best-in-breed fusion of cutting-edge, value-adding technologies, including 2nd generation Biometrics, Video, Behavior Analysis, Facial Recognition, and License Plate Recognition.

FST21 leads the way in bringing the technology of tomorrow to market today. "We are very excited to forge new relationships here in the Canadian security marketplace," Podolsky points out. "We look forward to expanding our operation here with our new clients and distribution partners and delivering to them the best access control solution available."

"FST21 is growing at a rapid rate," adds Major General Aharon Zeevi Farkash, CEO of FST21. "Our innovative In Motion Identification[™] capabilities in general, and our SafeRise® access control software in particular, are sought after solutions across the globe," he notes. "We are pleased to now serve our Canadian customers from our new Montreal office facility."

For details and complete information, please visit FST21's new website serving Canada at www.fst21.ca or email info@fst21.ca.

About FST21: FST21's SafeRise provides top security and convenience by fusion of real time information for fast and automatic visitor management. It's hassle-free and allows authorized users quick and convenient access.

SafeRise's *In Motion Identification*[™] uses a fusion of biometric and analytic technologies that include facial recognition, behavior analysis, voice recognition, LPR, RFID and more. FST21 is changing the way people will enter and exit controlled areas around the world, partnering with global and local system integrators who resell and install the SafeRise® systems as well as with OEM partners, in North America, LATAM and APAC. Customers include residential high-rises, commercial buildings, housing authorities, police, military, border control and other Homeland Security agencies, as well as security authorities at municipalities, airports, railways, sea and other transportation authorities.

The FST21 R&D team of professionals has substantial technology experience acquired in an array of inter-disciplinary development roles with leading multi-national and high-tech companies and during their military service. At FST21, they have the exciting challenge of forming the future of intelligent building safety and security solutions based on a fusion of 2nd generation video/voice biometrics & analytics. Founded in 2007 by Major (Res.) General Aharon Zeevi Farkash, a world expert in security, FST21 is a privately-held company. It is headquartered in Rishon Lezion, Israel and maintains a U.S. office in Massachusetts. For more information, please visit <http://www.fst21.com/>
